

Packaging

CMC is equipped with machines and facilities that can be set up and rearranged to produce products of varying sizes and packages. Our skilled employees can set up flexible production lines to accommodate whatever our customers need. We can add spoon, cracker and other accessories to a package, or encase multiple products in the same package. This flexibility allows our customers to order product in a format they know will appeal, in turn, to end consumers in a variety of retail settings.

Packaging	Net weight		Size (mm)
	Gram	OZ	
Aluminium Can	80-85	2.82-3.00	209.5/208 × 107

WE SERVE QUALITY TO THE WORLD

About CMC

CHOTIWAT MANUFACTURING PUBLIC CO., LTD. (CMC)

Having focused on product quality and customer engagement for a long time, the company has been a long-time business partner with several world-class tuna traders and has become a widely-recognized manufacturer in the industry. Despite holding a long history of more than four decades and having been established as an outstanding player in the seafood industry, CMC is still growing in capacity and expanding in partnerships even up until today.

Now, we have up to 3,500 employees on board with us in this growth. The business outlook for CMC is also bright. With the export value of more than USD 200 million, we develop products for more than 100 brands of tuna and export to more than 50 countries in the Middle East, Africa, Oceania, the Americas, East Asia, and Europe. Building upon our practiced craftsmanship and expertise, we are confident and optimistic about our prospects in the global market.

Standard Tuna & Salmon

Every part of the frozen tuna and salmon we provide is carefully sized to ensure that the texture and the nutritional value are preserved in the defrosting process. Our pre-cooked tuna is thoroughly cleaned and finely trimmed according to the product specifications. In the packing process, we use brine and healthy oil to enhance the tenderness of the tuna meat. Our team pays attention to the quality of our products in every single step because we serve only the best we can to the world.

Value-Added

We are committed to bringing innovations to the world. In the growing global market, we have developed unique recipes and processing techniques for the value-added and ready-to-eat market segments. To ensure our standing as a world-class seafood supplier, we carefully select ingredients that render an authentic culture-specific taste to perfect our tuna and salmon.

Soup

CMC has formulated four new recipes for our soup products. To serve you the best we can, we only use natural ingredients in our recipe. Although we have many selections of flavors in our line-up, we do not add any flavor enhancers or preservatives in the process at all. We welcome the customization of the ingredients, packaging, and specific nutrients according to your preference. You will not need to sacrifice “tasty” for “healthy” anymore when you can get the best of both worlds in our soup.

Pet Food

CMC is specialized not only in canned fish. We are also equipped with expertise in pet food manufacturing. With our products, we work our best to provide your beloved four-legged companions with a healthier pet food experience. The recipes for pet food products are customized according to the request of our customers. Apart from choosing the ingredients, you can also decide on the packing style that best fits your requirement.
